EDUCATION

Vivekanand Education Society's Institute of Technology (VESIT) <i>Bachelor of Technology in Computer Science & Engineering (CGPA: 8.0/10)</i>	Mumbai, India Aug 2025 – Present
JSPM's Bhivrabai Sawant Polytechnic <i>Diploma in Computer Engineering (Percentage: 90.46%)</i>	Pune, India Aug 2022 – May 2025
Bawachi Vidyalaya Paranda School <i>Secondary School Certificate (SSC) (Percentage: 89.00%)</i>	Dharashiv, India Jun 2021 – Mar 2022

EXPERIENCE

Infaneet Digital Solution and Web Media <i>Software Engineer Intern [View Certificate]</i>	Pune, India Jun 2024 – Jul 2024
- Contributed to full-stack web development tasks, gaining hands-on experience with production-level SDLC workflows. - Optimized frontend components to improve page load speeds and responsiveness across devices. - Collaborated with senior engineers to debug critical issues and implement client-requested features.	

PROJECTS

Q-PULSE — Clinic Patient Queue Tracker <i>Next.js, TypeScript, Firebase, Vercel</i>	Dec 2025 – Apr 2026
- Developed a full-stack Progressive Web App with real-time state synchronization using Firebase Firestore 'onSnapshot', eliminating client-side polling for live patient flow. - Architected a secure Role-Based Access Control (RBAC) system with OTP authentication and implemented an immutable audit trail for tracking operations and soft-deletes. - Engineered a complete token-based patient lifecycle system deployed on Vercel with edge-compatible API routes for sub-second cold starts. [Live Demo] [View Code]	
Hybrid Graph RAG AI Engine <i>Python, Neo4j, ChromaDB, Docker</i>	Oct 2025 – Present
- Designed a Python ETL pipeline to ingest unstructured technical manuals, chunking text into ChromaDB for retrieval and Neo4j for structured factual accuracy. - Containerized the application using Docker & Docker Compose, orchestrating microservices for the backend, Graph DB, and Vector DB to ensure consistent deployment. - Implemented backend logic using LangChain to orchestrate API calls between LLMs and vector stores. [Live Demo] [View Code]	
SMS-Based Remote Security System <i>Java, Android Backend, Firebase</i>	Aug 2024 – Feb 2025
- Engineered a background service framework using Broadcast Receivers to parse asynchronous SMS payloads for offline device control. - Implemented secure data handling with Firebase Authentication and local databases to manage user logs. - Developed features to remotely retrieve GPS coordinates and trigger events without internet. [View Code]	

TECHNICAL SKILLS

Programming Languages: C++, Java, Python, SQL
Web Technologies: Next.js, Django
Other Tools: LangChain, Docker, Git

ACHIEVEMENTS

- Rated 2 Star** on CodeChef ([abhishek90_21](#)): Max Rating 1472 | Global Rank 439 in Starters 220 (Jan 2026).
- Rated Pupil** on CodeForces ([Abhishek9021](#)): Max Rating 1307 | Secured Rank 1269 in Hello 2026 Contest.
- Secured 1st Rank** in Advanced Computer Networks (ACN) in Diploma, scoring a perfect **100/100**. [View Certificate]
